

## On the Subject of Lengthy Lockdown

*"I can't wait for 2 weeks off of school!"*

This is module in which you log certain numbers provided on a display to match a certain code.

### Display

On the module, there is a number display. This display shows both the current number, and your current log. You must match your log with the provided log below.

### Log

The only accepted numbers for a log are within the table below, in the exact sequence from left-to-right.

12	5	14	7	20	8
L	E	N	G	T	H

### Accepting

If the number is within the log, you must accept it and **then** log it.

### Refusing

If the number is **NOT** within the log, you must refuse it. Logging a refused number will result in a strike.

### Rules

1. You must accept the number, then log it. You cannot log a number before accepting/refusing it. This results in a strike.
2. If you complete the number sequence and send the final log with incorrect numbers, you will restart. This results in a strike.
3. You cannot refuse a correct number. This results in a strike.
